

Parallels RAS for Manufacturing

Instant and secure access to corporate applications on any device

"Parallels RAS is a great solution for publishing applications quickly and easily!"

Carlos Henao - System Administrator at Tech-24

NO NEED TO RETRAIN STAFF

Ease of use that does not require workers long training cycles by providing full-featured applications on mobile devices by enabling native touch gestures (touch, drag, zoom, copy and paste)

WORKERS AND MANAGERS

Making Windows applications such as ERPs and CAD available on any device, allowing workers on-the-go access to applications while working across distributed facilities.

SUPPLY CHAIN

The supply chain can be very complex. Enabling your suppliers to securely view the current stock of goods will allow you to reduce advanced provisions and provide secure access for vendors to pro-actively manage deliveries.

REAL-TIME LOGISTICS

Uninterrupted access to customer information and workflow is critical for quick decisions. Drivers can access logistics information from a secured website using any device (PC, Mac, Tablet and more) without having to use custom applications.
